

## **TRAINING COURSE**

**Course: A short course in Environmental Health Impact Assessment**

**Date: February 3<sup>rd</sup> – 5<sup>th</sup>, 2019 Kampala, Uganda**

### **Introduction**

Environmental health impact assessment (HIA) is a process and planning tool that systematically identifies and examines, in a balanced way, both the potential positive and negative health impacts of an activity or development project. Lukhwells International (Uganda) in collaboration with experts in Uganda and from Malaysia, will conduct a short training course on environmental health impact (EIA) assessment to build management and leadership skills among frontline organizations, -both government and non-government institutions, and the private sector.

### **Course Objectives**

To build leadership and management capacity at the operational level in environmental health assessment delivery for improving quality, efficiency, effectiveness and equity.

By the end of the course candidates will acquire:

1. Knowledge in health risk and its impact;
2. Environmental Toxicology;
3. Environmental Impact assessment;
4. Hazard Identification;
5. Dose-response assessment;
6. Practical exercises on Hazard identification;
7. Exposure assessment;
8. Demonstration on exposure monitoring
9. Risk Characterization exercises;
10. Qualitative health impact assessment;
11. The EIA process and climate change in Uganda;
12. Guidance Document on HIA in EIA;
13. Developing a conceptual site Model (CMD);
14. Determining site specification Action level;
15. Risk Communication

## Course structure and venue

The programme consists of 15 course units. The trainee is expected to make three days visits to the venue in Kampala, Uganda consecutively.

## Who should attend?

1. Holders of diploma or higher education in environmental studies and social sciences or science fields (related to environmental aspects), or those at least one year of professional employment in government or non-government organisations including at district (Environmental Officers), or those in environment facilities or NGO and private researchers.
2. As part of building peer-support, two or more eligible persons working together in the same institution/ programme are encouraged to apply as a team.
